BUSINESS ANALYTICS INTERNSHIP

1. Project Overview & Objective

- Objective: Identify businesses in Delhi that have strong customer ratings but limited digital presence and recommend opportunities for website development.
- Scope:
 - 10,041 Businesses
 - Multiple Delhi localities
 - 14 Business Categories
- Deliverables:
 - Cleaned Dataset
 - Business Summary Report
 - Power BI Dashboard
 - Top 10 Business Opportunities
 - Final Recommendations

2. Dataset Description & Data Cleaning

Source

Google Places API
Automated data collection
using Python

Key Fields

Business Name, Area, Category,
Rating, Review Count, Website
Phone Number

Cleaning Steps

Cleaned data, standardized
categories, and generated digital
presence, rating, review, and
opportunity classifications.

3. Methodology (Excel + Power BI)

- The project began with data collection using the **Google Places API** and **Python**. The **dataset was then cleaned and preprocessed in Excel** by removing duplicates and standardizing categories. Feature engineering was performed to create **Digital Presence, Rating Band, Review Band, and Opportunity Level fields**. The processed data was analyzed in Excel and finally visualized through an interactive **dashboard developed in Power BI for business insights and opportunity analysis**.

4. Dashboard Overview

The dashboard includes KPI cards for key business metrics, digital presence distribution, category-wise analysis, top opportunity areas, opportunity distribution, top business opportunities, and interactive filters for dynamic data exploration.

5. Key Insights

- A total of 10,041 businesses across various categories were analyzed to understand their digital presence, customer engagement, and business opportunities.
- 50.61% of the businesses do not have an official website, highlighting a significant gap in digital adoption and a strong potential for online transformation.
- The average business rating is 4.52 out of 5, indicating that most businesses have positive customer feedback and maintain a good reputation among users.
- 2,854 businesses were classified under the High or Very High Opportunity categories, making them ideal candidates for website development and digital marketing initiatives.
- Mobile shops, clothing stores, tuition centres, and jewellery stores emerged as the sectors with the greatest potential for improving their online presence, as many businesses in these categories operate without an official website despite having strong customer ratings.

6. Top 10 Business Opportunities

Businesses with strong customer ratings and digital growth potential:

Rank	Business Name	Category	Area	Rating	Reviews
1	Vardaan Mobile	mobile shops	Saket, Delhi	5	1017
2	Fashion Craft	clothing stores	Connaught Place, New Delhi	5	987

8	AD BEAUTY LOUNGE LADIES PARLOUR	salons	Burari, Delhi	5	506
9	Maths Mantra Best Maths Institute(Maths by Puneet chaudhary)	tutoring centers	Mukherjee Nagar, Delhi	5	499
10	Shresth PCS Academy, Best PCS Test Series Coaching in Mukharjee na	tutoring centers	Mukherjee Nagar, Delhi	5	447

Selection criterion

- Rating ≥ 4.5
- No Official Website
- High Review Count
- High / Very High Opportunity

Recommendations:

- Develop responsive websites for businesses without an online presence.
- Integrate Google Maps, contact details, and enquiry forms.
- Enable online ordering, booking, or registration where applicable.
- Showcase products, services, and offers through digital catalogs.
- Improve online visibility using SEO and social media integration.

Overall Recommendation:

- Encourage businesses to strengthen their digital presence through professional websites, improved online visibility, and customer-friendly digital services.
